## **CURRENT RESEARCH**

### *Principal Investigator*

Project PrEP-R: Network support to engage and retain younger Black MSM in PrEP care  
R34MH111392 National Institute of Mental Health

Duration of Study: 2016 – 2019 Total cost: \$677,737

This study is refining and testing the feasibility, acceptability, and preliminary efficacy of Project WERK (Wellness, Encouragement, Respect, and Kinship), a social network support intervention designed to promote sustained engagement in PrEP care among HIV-negative young Black men.

### *Co-Investigator*

Examining biomarkers and mechanisms of health disparities in sexual minority women  
1R01HL137246 National Heart, Lung, and Blood Institute

Duration: 2017 – 2021 Total cost: \$2,500,000

This study will link prospectively gathered data on discrimination and childhood adversity to determine the role of stress exposure in the relation between sexual minority status and health using biomarkers of cardiometabolic functioning and inflammation. Data are from the Pittsburgh Girls Study, an ongoing longitudinal study with a representative, racially diverse sample of young women.

PI: Keenan

### *Principal Investigator*

Families Forward Coalition

Vice Provost's Office for Diversity and Inclusion, Office of Civic Engagement, the Center for the Study of Race, Politics, and Culture, and the Mansueto Institute for Urban Innovation,

Duration: 2019 – 2020 Total cost: \$3,500

This project will establish a coalition of sexual and gender minority youth of color, their families (kin and choice), and community stakeholders in order to develop a community-based participatory research and service group that will guide future research and service initiatives.

### *Consultant*

HIV Prevention among Street Connected Youth

Shota Rustaveli National Science Foundation

Duration of Study: 2018 – 2021 Total cost: \$70,000

This study will examine the relation between social networks, social-psychological factors, and substance use and sexual behaviors among street-connected youth in Tbilisi, Georgia. Study activities include in-depth interviews with service providers and street-connected youth, and a cross-sectional survey with street-connected youth aged 13 to 19 years old.

PI: Sadzaglishvili

### *Co-Investigator*

Behavioral, Social, and Implementation Sciences Core (BSIS), Third Coast Center for AIDS Research  
1P30AI117943 National Institutes of Health

Duration of Study: 2015 – 2020 Total cost: \$1,102,466

The BSIS Core facilitates collaboration between TC-CFAR investigators to analyze epidemiological and other data; facilitate HIV/AIDS research in the social and behavioral sciences; provide training in implementation science; and increase community engagement and involvement in HIV/AIDS research.

PI: Moskowitz

*Principal Investigator*

PrEParing our Youth

Third Coast Center for AIDS Research Pilot Award

Duration of Study: 2016 – 2019                      Total cost: \$50,000

This study will examine parent and adolescent perspectives on parental involvement in PrEP decision-making among younger Black sexual minority men and transgender women in Chicago.

Multiple PIs: Bouris and Kuhns

*Co-Investigator*

Accelerating PrEP Diffusion among Black MSM

R01AI120700                      National Institute of Allergy and Infectious Diseases

Duration of Study: 2015 – 2019                      Total cost: \$3,143,569

This study will use Facebook to characterize the social networks of younger Black sexual minority men in order to identify, recruit, and train peer change agents to promote PrEP to young Black men.

PI: Schneider

**COMPLETED RESEARCH**

*Co-Investigator*

Motives for heavy cannabis use among young men who have sex with men living with HIV/AIDS

R03DA041908                      National Institute on Drug Abuse

Duration of Study: 2016 – 2018                      Total cost: \$168,845

This study examined motives associated with heavy cannabis use among HIV positive young gay, bisexual and other men who have sex with men in Illinois and Colorado, and the association between cannabis use and HIV Care Continuum outcomes.

PI: Bruce

*Principal Investigator*

Next Generation Partner Notification and Intervention Services

R34MH104058                      National Institute of Mental Health

Duration of Study: 2015 – 2018                      Total cost: \$237,000

This study tested the feasibility, acceptability and preliminary efficacy of integrating a tailored PrEP intervention in to partner services and network HIV testing services.

Multiple PI: Bouris and Schneider

*Co-Investigator*

Story Lab: Impacting the Public Humanities and Public Health through Digital Narratives

Neubauer Collegium for Culture and Society

Duration of Study: 2016 – 2018                      Total cost: \$200,000

The Transmedia Story Lab will explore how narrative arts can influence adolescent health and policy.

Multiple PIs: Gilliam and Jagoda

*Co-Investigator*

Developing a Pre-Exposure Prophylaxis (PrEP) mobile health app for young Black MSM: miPrEP

SP0033957/ Parent: P30AI117943                      National Institute of Allergy and Infectious Diseases

Duration of Study: 2015 – 2016                      Total cost: \$157,989

This project developed and pilot tested the acceptability of a mobile health app to increase knowledge and awareness of PrEP among young Black gay, bisexual and other men who have sex with men.

PI of Subcontract: Hill

*Principal Investigator*

Preventing HIV/AIDS among Young Black MSM

National Institute of Minority Health and Health Disparities

Duration of Study: 2013 – 2015

Total cost: \$54,312.53 (Loan Repayment)

Research activities focused on developing empirical knowledge on the family influences associated with preventing HIV/AIDS among young Black gay and bisexual men aged 13-29 years old.

*Co-Investigator*

Network Supported Engagement in HIV Care for Younger Black Men

R34MH097622-01

National Institute of Mental Health

Duration of Study: 2012 – 2015

Total cost: \$450,000

A randomized controlled trial of Project nGage, a social network social support intervention to improve engagement in HIV care among young Black men living with HIV.

Multiple PIs: Schneider and Voisin

*Principal Investigator*

Parents' Role in Preventing HIV among Black and Latino YMSM: Parent, Youth, and Provider Perspectives

Subcontract: Center for AIDS Prevention Studies, UC San Francisco, National Institute on Drug Abuse Grant No. 5R25DA028567-02

Duration of Study: 2010 – 2015

Total cost: \$25,000

The overall purpose was to better understand family relationships and communication about sex among LGBT youth and their parents, and the connections between youth, parents and providers.

*Principal Investigator*

South Side Stories

Ford Foundation

Duration of Study: 2013 – 2015

Total cost: \$500,000

The project used digital storytelling with African American heterosexual and sexual minority youth to elucidate how social contexts shape youth health, identity and development.

Multiple PIs: Bouris and Gilliam

*Principal Investigator*

Exploring Youth Perspectives on Digital Storytelling as a Method to Support Empowerment and Health  
Renée Logan Faculty Research Fund and the SSA Fund for Faculty Research, University of Chicago

Duration of Study: 2013 – 2015

Total cost: \$5,000

This study examined the perspectives of youth who participated in a digital storytelling project.

*Principal Investigator*

Project READY: The Chicago Youth Study

Subcontract: Institute for Translational Medicine's Pilot Projects in Translational and Clinical Studies Award, National Center For Advancing Translational Sciences, Grant No. UL1TR000430

Duration of Study: 2013 – 2015

Total cost: \$40,000

This study examined HIV risk and protective factors at the individual, family, and community levels among sexual minority adolescent males and transgender females ages 13-19 years old.

*Principal Investigator*

Family and School Engagement to Protect Gay Youth of Color from HIV, CHAS Seed Grant
